Fast XML Uploading System

Objectives:

- Providing a user-friendly tool for easy and quick online compilation of journals from all OIC countries
- Accelerating journal's index process

Products:

ISC's Fast XML Uploading System provides users with systematic online submission options: **1)** Article specifications Submission (Title, Abstract, Keywords, References), **2)** Author's Affiliation (First Name, Surname, University/Organization, School, Department, Country and City), and **3)** Data dispatch in any XML template

ISC Master Journal List

Objectives:

- Covering all databases of ISC
- Providing quick access to journals indexed in various databases of ISC
- Providing access to high quality journals for publication of research articles
- Providing a user-friendly and comprehensive search engine for users to quickly and easily pinpoint a specific journal

Products:

ISC Master Journal List provides users with various options **1)** Title Word Search, **2)** Full Journal Title Search, **3)** ISSN Search, and **4)** Keyword Search

ISC Ranking of Islamic Countries' Universities & Research Institutes

ISC Ranking of Islamic Countries Universities & Research Institutes 2013-14 is a project which has ranked about 600 of top Islamic countries' universities and research institutions with highest number of publications in the most prestigious international scientific journals (core journals) during 2008-2012.

Methodology:

Each publication was assigned to one or several institutions through investigating the institutional affiliations mentioned by the authors of the publications. Because of variations in the name of institutions and the fact that organization names can change over time and they can also be born, die, split or merge, it is important, though difficult, to determine the authors of a paper's institutions correctly. Spelling variances for each institution were recognized and retrieved. Only documents of article, proceedings paper and review type published in the core journals were processed, which are referred to as paper in this methodology.

World & ISC Production Reports

Objectives:

- Yielding countries' latest scientific output statistics based on the data provided by the Web of Science since 2000
- Comparing scientific output of countries according to various scientometric indicators

Products:

ISC's World & ISC Production Reports provides significant updated scientometric information about approximately 190 countries according to the data provided by Web of Science: **(1)** Number of documents, **(2)** Country's share of world's total documents, **(3)** Country's share of region's total documents, **(4)** Rank in the world based on the number of documents, **(5)** Rank in the region based on the number of documents.

ISC Products' Collection

ISC provides access to objective content and powerful tools to search, track, measure and collaborate in the science, social sciences, arts, and humanities. The multidisciplinary research platform lets users search numerous databases simultaneously via one interface. ISC offers its services to a wide range of stakeholders, including Researchers, University Administrators, Governments, Libraries, and Publishers.

Islamic World Journal Citation Reports (JCR)

Objectives:

- Systematic and objective review of the Islamic World's leading journals
- Providing the context to understand a journal's true place in the scholarly world
- Applying a combination of impact metrics, and citing and cited data points to comprise the complete Islamic World citation network

Products:

Through ISC's JCR, users can get access to **1)** journals' Impact Factors, **2)** journals' Immediacy Index, **3)** journals' Cited Half-Life, **4)** journals' Total Cites, **5)** journals' Total Articles, **6)** Citing Journals, **7)** Cited Journals, **8)** Journals' Bibliographic Information, **9)** Advanced Filtering Options, and finally **10)** Trend Analyses

Islamic World Science Citation Index (SCI)

Objectives:

- Revealing current scientific trends and patterns in the world
- Identifying emerging fields of research
- Identifying leading researchers, institutions, and journals
- Compiling the scientific map of the Islamic World
- Determining influential and top subjects within each field

Products:

ISC's SCI offers various analyses options including **1)** Times Cited, **2)** Full-text Articles, **3)** Complete Bibliographic Information, **4)** Cover-to-cover Journal Indexing, **5)** Institution-based Result Analysis, **6)** Time-based Analysis, **7)** Author-based Analysis, **8)** Source-based Analysis, **9)** Subject-based Analysis (both Main and sub-subject), and **10)** Graph-based Analysis

ISC English Current Contents

Objectives:

- To provide access to the extensive collection of ISC journals through a single search engine
- To provide access to full content and full bibliographic information of each journal
- To provide access to indexed journals' various issues and volumes

Products:

ISC's English Current Contents offers an extensive range of information for any indexed journal including Journal's **1)** ISSN, **2)** Address, **3)** Website, **4)** Volumes, **5)** Issues, and **6)** article titles along with the full-text of the articles

ISC Journal Performance Indicators (JPI)

Objectives:

- Comparing the performance of various journals based on popular scientometric indicators
- Precise calculation of IF by linking each source item directly to its citations
- Calculating cumulative impact measures for periods longer than one year (e.g., One-year periods, Three-year periods, All years, and The Last five years)

Products:

ISC JPI offers various comparison and analysis options: **1)** Citations Impact, **2)** Citations Impact of Cited Articles, **3)** Total Number of Citations, **4)** Total Number of Articles, **5)** Percent of Cited Documents, **6)** Relative Citation Impact of Journals in ISC, **7)** Percent of ISC Documents, **8)** Percent of Cited Documents out of all Cited Documents in ISC, **9)** Persian, English and Arabic Language Search Options
